## Focus of Q3 2018 results and fiscal 2018 forecast

$>$ Increased net sales and operating income year-on-year on Apr.-Dec. basis despite impact of fall in market prices centering on Petrochemicals in Chemicals.
$>$ FY 2018 forecast revised downward, but year-on-year growth in sales and operating income expected with firm performance in Homes and Health Care.

## Outline of Q3 2018 results

## Results for Apr.-Dec.

$\checkmark$ Highest ever net sales, operating income, and ordinary income; second highest net income attributable to owners of the parent.
$\checkmark$ Notable year-on-year increases in operating income: in the Material segment, Petrochemicals with high market prices for acrylonitrile, Fibers with firm performance of nonwovens centered on Lamous microfiber suede and Bemliese continuous-filament cellulose nonwoven, and Separators with increased shipments of Li-ion battery separators; in the Health Care segment, Critical Care with good performance of defibrillators for professional use, and Medical Devices with increased shipments of bioprocess products.
$\checkmark$ Year-on-year decrease in net income primarily due to lower gain on sales of investment securities and the one-time effect of the US tax reform in the previous year.

## Results for Oct.-Dec.

$\checkmark$ Material: sharp slowdown centered on Petrochemicals in Chemicals.

- Market prices centered on acrylonitrile plunged after sustaining high levels through H1, leading to deteriorated terms of trade, decreased shipments, and lower capacity utilization.
- Economic slowdown in China began affecting certain products for automotive and smartphone applications, although the impact was limited.
$\checkmark$ Homes and Health Care: in-line with the forecasts in November.

## Outline of fiscal year 2018 forecast

Forecast for the fiscal year
$\checkmark$ Material: forecasts revised downward centering on Petrochemicals in Chemicals. Impact of Chinese economic slowdown forecasted in other businesses as well.

- Main factor is the fall in market prices for acrylonitrile. Gradual recovery expected, subject to ongoing scrutiny.
- Impact of slowdown and uncertainty in automobile-related markets expected for engineering plastics, synthetic rubber, lead-acid battery separator, etc.
- Impact of stagnating growth in smartphone-related markets expected for electronic materials, electronic devices, etc.
$\checkmark$ Homes and Health Care: November forecasts remain unchanged.
$\checkmark$ Expecting profits to exceed the targets under "C's for Tomorrow 2018" mid-term management initiative (operating income of $¥ 180$ billion and net income of $¥ 110$ billion) and the original FY 2018 forecast announced in May 2018 (operating income $¥ 190$ billion and net income $¥ 140$ billion) as well as the FY 2017 operating income result.

## Shareholder returns

Year-end dividends will be determined based on FY 2018 consolidated net income results in consideration of total return ratio target of $35 \%$, as set forth in the mid-term management initiative.

Those figures are calculated provisionally prior to completion of PPA (purchase price allocation).
2 "Partial Amendments to Accounting Standard for Tax Effect Accounting" is applied from FY 2018. Accordingly, all deferred tax assets are shown under investments and other assets, and all deferred tax liabilities are shown under noncurrent liabilities. The figures at end of March 2018 have been revised retroactively to reflect the amendments.
